

PLAYING SURFACE STRUCTURE AND METHOD OF  
CONSTRUCTION OF A PLAYING SURFACE

ABSTRACT OF THE DISCLOSURE

5 A playing surface structure (100) comprises, a  
surface carpet layer (102), a resin impregnated textile  
layer (104), a random pile layer (108) comprising a  
compact resin loaded fibre stratum (109) and a layer of  
stratified fibrous material (110). The surface carpet  
layer (102) overlays the textile layer (104), the textile  
layer (104) overlays the random pile layer (108), and the  
layer of stratified fibrous material (110) is overlain by  
10 the random pile layer (108). A method of construction of  
a playing surface is also disclosed.
